Charging Cart - a mobile charging solution for educational environments, hospitality and more

Charging and storing devices is easy with the Manhattan 32-Port AC Charging Cart. It is the ideal solution for keeping devices ready and secure in schools, restaurants, gyms, doctor's offices, universities, hotels, car rental agencies and more. It helps you easily power up and store all the devices your students, guests, patients, customers and patrons use each day.

Smart Power

The built-in AC outlets in PDUs at the back of the unit make it easy to charge devices such as laptops, notebooks, tablets, phones and many others using their power adapters or wall chargers. Admins get easy access through the door on the back of the unit to easily plug into the outlets and feed the cables through to the devices.

Physical security

The sturdy, durable steel housing of this Charging Cart offers a visible sign of professional device management and protection. Key-locked front and back doors help keep devices secure while they charge or when they are not in use.

For more information on Manhattan products, consult your local dealer or visit www.manhattan-products.com.

The included heavy-duty casters let you roll the cart where you need it; wheel locks let you easily secure it in place.

Organized and versatile

Keep your devices organized in the bay slots that offer plenty of space (415 x 25 x 280 mm), even for bulky cases. The built-in cable-management clips on the bay dividers let you structure your charging cables (USB cables are available from Manhattan) for better organization and a cleaner look. The included power cable is removable for better storage.

Features:

- Safely stores and charges devices up to 15.6"
- Built-in UK BS1363A outlets (32 total) on the back
- Protection against overload, overcurrent, short-circuiting and voltage spikes
